RISE Pilot Phase- A Glimpse

RISE was implemented during March- August 2020 as a pilot in five states of India (Maharashtra, Madhya Pradesh, Odisha, Himachal Pradesh and Tamil Nadu) for capacity building of 2600 health workers. It was rolled out to address the growing needs of large number of healthcare workers due to rapid development in India's immunization program. It was very well accepted by the learners. 100% course completion was achieved in Madhya Pradesh and Himachal Pradesh, while it was 96% in Odisha and 74% and 68% in Tamil Nadu and Maharashtra respectively.

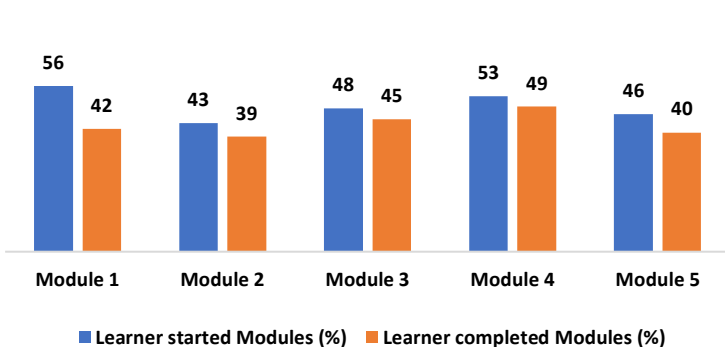

The pilot phase generated evidence of positive outcomes in establishing the effectiveness of this training model. A definite increase (14%) in knowledge level of the learners who completed the course, was observed during endline assessment as compared to baseline values. The improved knowledge also got translated in improving the practices of health workers during the immunization sessions, as observed during the practice assessment. More than 65% of the learners achieved gold certificate (score more than 85 out of 100) while 34% received silver certificate (score between 70-85 out of 100).

Gold certificate achiever in modules completed

Ms Sunita Solanki is posted at SHC Bor Ka Kheda. She wants to learn more; therefore, she always tries to complete the course on the same day whenever a module goes live in the district. She is also paving stones of peer-to-peer learning as she is supporting her colleagues, as and when needed.

In her words *"RISE is a very easy and useful application. It's the first time I have received in depth training on Immunization. My knowledge and skills are improved by using RISE application.*

She also told *"I am very happy as I have learned many technical things related to session management and vaccine administration. I wish in future other trainings would also be done in same way."*
